Penetration Tester | Cybersecurity Analyst | Bangalore, India

Professional Summary

Results-driven cybersecurity professional with hands-on experience in **web application penetration testing**, **network security assessment**, and **vulnerability management**. Proficient with industry-standard offensive tools including Burp Suite, Metasploit, Nmap, SQLMap, Wireshark, and OWASP ZAP. Solid grounding in **Active Directory pentesting**, **SIEM operations** (IBM QRadar, Splunk), MITRE ATT&CK, and Cyber Kill Chain. Experienced in producing CVSS-scored reports with PoC exploits and remediation guidance aligned with OWASP, PTES, and NIST. Actively pursuing CEH certification.

Experience

Cartel Software

Dec 2025 – Present

Penetration Testing Intern

Bangalore, India

- Conducted end-to-end **web application penetration tests** on 5+ applications following **OWASP Testing Guide** and **PTES** methodology, uncovering 15+ critical/high vulnerabilities including XSS, SQL Injection, IDOR, and Broken Authentication.
- Performed manual and automated exploitation using **Burp Suite Professional** (Intruder, Repeater, Scanner) to intercept 50+ HTTP/S requests, exposing session fixation, CSRF, and insecure direct object reference flaws.
- Executed **network reconnaissance and port scanning** across 20+ endpoints using **Nmap** (SYN scans, OS fingerprinting, version detection, NSE scripts) to enumerate exposed services and surface misconfigurations.
- Automated injection testing with **SQLMap** (time-based blind, error-based, union-based) and **OWASP ZAP** active scanning, reducing manual effort by **30%**.
- Performed **directory brute-forcing and CMS enumeration** using **Gobuster** and **Nikto** to uncover hidden admin panels, backup files, and server-side misconfigurations.
- Analyzed **network traffic** with **Wireshark** to detect plaintext credential transmission, insecure protocols, and anomalous packet patterns.
- Scored vulnerabilities using **CVSS v3.1**, categorized risk severity, and produced prioritized remediation roadmaps for development and management stakeholders.
- Authored professional **penetration test reports** with executive summaries, technical findings, reproducible PoC steps, and remediation recommendations.

Outlier.ai

Jun 2024 – Oct 2025

AI Trainer (Freelance)

Remote

- Evaluated 200+ AI-generated outputs; identified logical inconsistencies, edge-case failures, and validation gaps through structured analytical review.
- Delivered assessment reports that measurably improved model reliability and response accuracy across multiple AI pipelines.

NTPC Ltd.

Jun 2022 – Sep 2022

ERP / SAP Trainee

Korba, Chhattisgarh

- Validated and analyzed 1000+ enterprise records using **SQL queries** and SAP workflows, identifying data inconsistencies and enhancing operational accuracy.

The Sparks Foundation

Nov 2021 – May 2022

Web Developer & Design Trainee

Remote

- Built responsive, database-driven web applications using HTML, CSS, Bootstrap, JavaScript, PHP, and SQL, gaining foundational knowledge of web architecture relevant to security assessments.

Technical Skills

Penetration Testing

- ▷ Web App & Network Pentesting
- ▷ OSINT & Reconnaissance
- ▷ Post-Exploitation & Pivoting
- ▷ Privilege Escalation (Linux/Win)
- ▷ Password Cracking
- ▷ Red Team Operations

Web Application Security

- ▷ OWASP Top 10
- ▷ SQLi, XSS, IDOR, CSRF
- ▷ Auth & Session Bypass
- ▷ File Upload Abuse
- ▷ WAF Evasion
- ▷ CMS Exploitation

Offensive Tools

- ▷ Burp Suite, Metasploit
- ▷ Nmap, SQLMap
- ▷ OWASP ZAP, Nikto
- ▷ Gobuster, WPScan
- ▷ Hydra, Aircrack-ng
- ▷ Wireshark

SIEM & SOC Operations

- ▷ IBM QRadar (AQL, DSM, Offense Mgmt)
- ▷ Splunk (SPL, SOAR, Alerts)
- ▷ Log & Flow Analysis
- ▷ Threat Hunting
- ▷ MITRE ATT&CK, Kill Chain
- ▷ IOC / IOA / IOE Analysis

Network & Active Directory

- ▷ TCP/IP, DNS, HTTP/S, OSI
- ▷ Firewalls, IDS/IPS, VPN, DMZ
- ▷ AD Enumeration & Exploitation
- ▷ Kerberos, Pass-the-Hash
- ▷ CVSS v3.1, Vuln Management
- ▷ Packet Analysis

Frameworks, OS & Scripting

- ▷ OWASP, PTES, NIST CSF
- ▷ ISO 27001, PCI-DSS, GDPR
- ▷ Kali Linux, Ubuntu, Windows
- ▷ Python (Pentest Automation)
- ▷ Bash / Shell Scripting
- ▷ EDR/XDR, DLP, Cloud Security

Projects

- Cryptrion Cyber** | *Full-Stack Cybersecurity Platform & Threat Intelligence Dashboard* *cryptrion-threats.vercel.app*
- Built a professional cybersecurity platform with an **automated live threat intelligence feed** aggregating real-time CVE data from **CISA KEV, NIST NVD, and US-CERT** across 5+ security sources.
 - Designed and deployed a **Daily Adversary Threat Digest** dashboard — auto-parsed threat reports published live, demonstrating applied threat intelligence engineering skills.
 - Conducted **OWASP Top 10** vulnerability assessment on the platform; identified and mitigated **5+ security vulnerabilities** spanning input validation, authentication flaws, and access control weaknesses.
 - Produced CVSS-scored findings with PoC reproduction steps and remediation guidance; platform live at cryptrion-cyber.vercel.app.
- Cryptrion Threat Intel** | *Live Threat Intelligence Dashboard* *cryptrion-threats.vercel.app*
- Designed and deployed an **automated live threat intelligence feed** aggregating real-time adversary data from **CISA KEV, NIST NVD, and US-CERT** — continuously parsed and published across 5+ security sources.
 - Built a **Daily Adversary Threat Digest** engine that auto-fetches, parses, and renders CVE intelligence reports with zero manual intervention, demonstrating applied **threat intelligence automation** skills.
 - Implemented a real-time monitoring dashboard with live UTC feed status, refresh controls, and structured report display — bridging threat data ingestion and analyst-ready output.
 - Demonstrates practical knowledge of **IOC tracking, CVE lifecycle monitoring**, and threat intel pipeline design aligned with SOC and threat hunting workflows.
- Wanderlust** | *Full Stack Web Application Penetration Test* *Burp Suite, SQLMap, Gobuster*
- Black-box pentesting uncovered **8+ vulnerabilities** including authentication bypass, IDOR, and weak session token generation.
 - Demonstrated exploitability via reproducible PoC payloads; recommended WAF tuning and parameterized queries as mitigations.
 - Delivered a professional bug report with CVSS ratings, impact analysis, and prioritized remediation steps.

Education

Chhattisgarh Swami Vivekanand Technical University

B.Tech in Computer Science & Engineering

2019 – 2023

CGPA: 7.89 / 10

Certifications & Training

Certified Ethical Hacker (CEH) — EC-Council (*Pursuing*)

SQL and Relational Databases — IBM

Cybersecurity Professional Training — Comprehensive industry program covering:

- Linux Administration, Networking Fundamentals & Protocols, Network Security (IDS/IPS, Firewalls, VPN, DMZ)
- Web Application Pentesting, Bug Bounty Methodology (Recon, Mind Maps, Report Writing), Active Directory Pentesting
- SIEM: IBM QRadar (AQL, Offense Mgmt, DSM, Rule Mgmt) & Splunk (SPL, SOAR); Threat Intelligence & Threat Hunting
- Compliance: ISO/IEC 27001, NIST CSF, GDPR, HIPAA, SOX, PCI-DSS; Standards: PTES, OSSTMM, OWASP
- Endpoint Security (EDR/XDR, DLP), Cloud Security, Social Engineering, Wi-Fi Security, IoT Security
- Python & Bash Scripting for Pentesting Automation; CTF Competitions (Web & Network categories)

Achievements

Represented **Chhattisgarh in National School Games** (2017, 2018) – Throwball & Football.

Participated in the **National Scouts and Guides Jamboree** (2017).

Competed in multiple **state-level sports tournaments** during secondary school.
